

## Matt Hayes

I am the Vice-President for Science and Engineering. During my time as a student I studied Audio Music Technology. I have completed the first 2 years of my degree and I am currently intermitting my studies to be an officer. This year I am working on access to specialist facilities within my faculty as well as implementing a Drug Harm Reduction scheme

I am a very keen musician and I spend the vast majority of my spare time driving my band several hundred miles order to play bass for 30mins then drive home again.
