

ENVIRONMENTAL & COMMUNITY REP (CAMBRIDGE) ONE PAGE PLAN

Name: Lauren Fidler

Name of priority campaign: Fairer vegan options on campus

Input (resources, time and budget)	Activity	Completion date	Outcomes (the result, effect, change etc)	Indicators of outcome
<p>Research into businesses in the local community to scope interest into having them visit campus once a month to sell vegan food, once selected then find out when they would be able to visit campus and for how long.</p> <p>Look into how much it would be to accommodate a local business on campus once a month to sell vegan food in the courtyard.</p>	<p>Create an online questionnaire to be available through Anglia Student for our Cambridge students to complete to find out how many people are vegan and how often do they visit campus, and work with the VeganSoc to raise awareness of this questionnaire and campaign. The questionnaire could be finished and live by Friday 6th November.</p> <p>Work with the catering team to finalize a meal using ingredients already bought for meat dishes, so no massive expense has to be made to accommodate vegan dishes. Then we can talk about possibly eliminate a meat option, so if there are more than one meat dish/sandwich/pastry available, stop selling one of each and replace it with a vegan option.</p> <p>We could leave this live for a week to give students a chance to fill it out and I could also be present on campus with an online tool to ask students while they are here to fill it out with me. The results of this would give us an idea of how many students we</p>	<p>I think this would be an ongoing campaign, I don't think it will happen overnight and it could possibly be completely finalized by the start of the January/February term.</p>	<p>We would have a more environmentally friendly and green university, working towards that gold green award and most importantly we would have happier students on Cambridge campus. The effect would be that we would have given more food options to our students, vegan and non-vegan, so they can be made aware of different and healthier food options. We would also have given a local business the chance to grow their customer base by getting them on campus, therefore possibly leading to healthier eating students. Indicators of the outcome would be running another questionnaire once the new and more frequent vegan options have gone live to see how students feel about the new options, have they tried it, did they enjoy having an outside business on campus, general feedback about the changes.</p>	

	are/are not catering for on campus. Talks with the restaurant team can be had during the week the questionnaire is running, to find out their buying list and how we could use the already ordered ingredients to make a vegan dish.
