

EXECUTIVE COMMITTEE UPDATE

SIOBHAN FOUCHE - Vice President (Science and Engineering)

My campaigns, policy and other work

**My campaigns**

Survivor Support	In Progress
<p>I am currently sorting out the little details, such as putting on events and getting a blog started. I have received some posters from NAPAC to put up around the university - i just need to meet with counselling and wellbeing again to make sure i can still use their wellbeing walls for this information. Conversations have begun in the relevant areas of the SU to begin creating a brand and some events being put in the calendar.</p>	
Sustainability - aka saving the world one student at a time	In Progress
<p>This is ongoing - much like the climate crisis - with hopefully some more conversations with the GIS to see where we can collaborate and the sustainability society to see if there are any events we could do together/ how can we support each other in this. Researching other SUs initiatives to get ideas - the crisp packet recycling needs more sign posting so i want to see if that is possible.</p>	
FSE - unhappy students make unhappier lecturers	In Progress
<p>Based upon the countless meetings i have had with my faculty (FEC, FPT, etc) there is some clear tension between staff and students - especially in regards to student feedback (which at times is non-existent). Hopefully i can begin conversations with students on how they feel about various feedback forms and why there is a lack of engagement in these; this could be the beginning to solving an issue in the faculty and hopefully leads to positive changes.</p>	

Other relevant updates

I have been phasing back into work after having some time off for Mental Health issues, so please bare with me in getting back to people and organising myself. I will be starting to block out an hour a day (hopefully) to get out and chat to students so PLEASE encourage them to come and have a chat or message me to sort out meeting for a coffee and a chilled catch up. FEC was uneventful and there is nothing to report, other than Em was amazing.
