Divestment from Fossil Fuels 14-11-2013

Propose by: Atus Mariqueo-russell

Union Notes

- 1. That climate change is directly supported by those institutions that profit by holding shares in fossil fuel extracting companies.
- 2. That Anglia Ruskin may or may not have such stocks, the information can only be extracted through a freedom of information request.
- 3. That we are in the unique position of being able to tell the university exactly what investments we are happy and unhappy for them to support.

Union Believes:

1. That Anglia Ruskin should have no stocks in fossil fuels and should divest from any current stocks, as well as refrain from investing in any future stocks.

Union Resolves:

- 1. To submit a freedom of information request to find out exactly what investments the University holds.
- 2. To pressure the University into withdrawing from investments in fossil fuels.
